

Graded Care Profile 2 (GCP2)

Being a parent doesn't come with instructions.
It can be difficult and you may need some extra support to help make sure you get things right.

When we work with your family we may use the Graded Care Profile 2 (GCP2). This helps us to understand what you are doing well, and where you might need some extra support.

What happens?

We will meet with you, at a time that is good for you. At the meeting we will look at different parts of being a parent, such as:

Health

Food

Clothing

Hygiene

Emotional Care

**Play, School
& Friends**

Your worker will give a score to each area, based on whether they are things you are good at, or things that you find a bit harder.

You can also grade yourself, and, if your child would like to, they can also grade you.

The scores

- 1** Really excellent – couldn't get any better
- 2** Still really good
- 3** OK, but you might need some help to get better
- 4** Not good, and means you need to make some changes
- 5** Worrying and means things need to get a lot better

The scores help us to find out what you're really good at, or where you might need some extra support.

We will then work with you to agree what we all need to do for things to improve, and what support you can access.

We will review your scores regularly to see how things have changed, and what we all need to do next.
